

Preventive Maintenance

Avoid the unexpected ...

and ensure optimum performance and reliability of your equipment at all times.

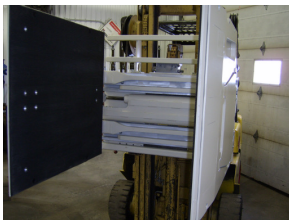

Preventative maintenance is a safety-net designed to prevent the failure of equipment before it happens.

Some of the benefits of preventive maintenance :

- Preventive maintenance aims at reducing or eliminating breakdowns and unplanned downtime.
- Machinery that is not well-maintained can become a safety hazard. Preventive maintenance increases the margin of safety by keeping equipment in top running condition.
- Productivity is enhanced by the decrease in unexpected breakdowns and by the optimum performance of the equipment.

Preventive Maintenance Provides a Competitive Advantage

Preventive Maintenance = Savings

Rather than creating new expenses, preventive maintenance will result in savings through reliability and extended life of equipment, decreased downtime, decreased replacement costs, decreased overtime due to breakdowns, ...

We'll help you design and implement a preventive maintenance program, in accordance with the manufacturer's recommendations, suited to your specific needs and tailored to keep your costs in line and deliver the peace of mind you deserve.
