

Electrical Light Bar Kit

Canadian Flexible T.M. Inc.'s electrical light bar kit greatly **reduces damage caused by incorrect clamping force** during cargo handling operations.

Available in **12V, 24V or 48V**, it can be installed on any model and brand of lift truck and can be used for **any type of load** that requires controlled pressure handling.

Our standard model is designed for four (4) different pressure settings, but can be made for more than four (4) if required.

The kit is delivered with all the components you will need to mount it onto your lift truck:

- A water and dust proof junction box, with a 4 position switch.
- A fuse holder and a 5 amp fuse.
- Fifteen (15) feet of 2 X 1.5mm² wire, going from the junction box to the fuse panel on the lift truck.
- A mounting bracket for the junction box.
- A main hydraulic block, with adjustable relief valves for each position.
- Fifteen (15) feet of 7 X 1.5mm² wire, going from the hydraulic block to the junction box.
- A pressure gauge, with a 90° adaptor for installation.
- Two (2) fittings for connecting the 2 hydraulic hoses to the hydraulic block.
- Two (2) T-connectors for mounting of the two (2) hydraulic hoses into the hydraulic circuit for clamping function.
- Two (2) hydraulic hoses.
- Fifteen (15) feet of 7 X 1.5mm² wire, going from the light bar to the junction box.
- A light bar with four (4) lights.
- Four (4) light bulbs.
- A bracket for mounting the light bar onto the lift truck.
- Mounting instructions.
- Pressure setting instructions.
