

Refurbished Clamping Plates

Before refurbishing process

Before refurbishing process

After repairs & sandblasting

The simple fact is that you will need to replace the clamping plates, and maybe even more than once, before the actual clamp needs to be replaced.

Canadian Flexible T.M. Inc. offers you an **alternative economical solution**, representing substantial cost savings for your company.

The refurbishing of the clamping plates is a **rapid process**, consisting of :

- Removing all the existing rubber (if any, or if damaged).
- Repairing the steel surface, to make it even for vulcanizing.
- Sandblasting the clamping plates.
- Vulcanizing new first quality rubber on them.
- Grooving a pattern in the rubber (if requested).
- Repainting the plates Flexiclamp yellow, or to the customer's chosen color.

Your clamping plates are delivered back to you with a **3 (three) month warranty**.

Contact us today to get a quote for refurbishing your clamping plates or to further inquire about any of our services.
